

Obfuscated Life (points - 50)

There is a .js file. Simply pasting the element `_0x6ab222` into the console will reveal an array of strings, which holds almost all the parts of the flag. With some simple reversing logic, the flag can be reconstructed.

Or, else an online deobfuscator can also help.

Flag: `hacks{don't_be_a_obfuscated_nerd}`
